## Digital Pressure Gauge

- ▶ ceramic sensor
- ▶ optional:
  - analogue output
  - Ex-protection (for 2-wire)
  - oxygen application
  - flush pressure port
- ▶ nominal pressure ranges  
from 0 ... 160 mbar  
up to 0 ... 600 bar

### Description

The digital pressure gauges DM 201 is suitable for the usage in viscous, pasty or highly contaminated fluids. Compared to the universally used basic type DM 200, the DM 201 has a mechanically and chemically robust ceramic sensor instead of a stainless steel sensor. For aggressive media additionally the device could be equipped with a pressure port in PVDF or PVC.

### Operation

The rotatable display module shows the system pressure and allows programming. The device can be operated menu-driven via two push buttons. Beside the possibility to configure the display parameters (decimal point position, damping, etc.) the measured minimum and maximum values can be indicated. Furthermore, an access protection can be activated in the menu system.

### Applications

- ▶ environmental engineering
- ▶ machine and plant engineering

- ▶ option analogue output:
  - 4 ... 20 mA / 2-wire
  - 4 ... 20 mA / 3-wire  
**with turn-down 1:5**
  - 0 ... 10 V / 3-wire
- ▶ indication of measured values  
on a 4-digit LED display
- ▶ rugged, rotatable plastic  
housing
- ▶ easy configuration via  
two push buttons
- ▶ ingress protection IP 65
- ▶ variety of mechanical  
connections
- ▶ industrial standard in view of  
accuracy, thermal behaviour and  
long term stability
