

DS 200 P

Electronic Pressure Switch with Flush Process Connection

- ▶ piezoresistive pressure sensor
- ▶ for foodstuff industry, pharmacy, chemical industry, etc.
- ▶ medium temperature up to 300 °C
- ▶ nominal pressure ranges from 0 ... 100 mbar up to 0 ... 40 bar

The electronic pressure switch DS 200 P is the successful combination of:

- precise process pressure transmitter
- intelligent pressure switch
- digital display

Any viscous and pasty media can be used which are compatible with stainless steel 1.4435 (316L).

Basic element of the DS 200 P is a piezoresistive stainless steel sensor. The 4-digit LED display shows the system pressure and supports programming the DS 200 P using the foil keys. Set and reset points are freely configurable in the range 0 to 100 % of the nominal pressure. Display and housing of the DS 200 P are rotatable, so that the position of the display can be easily adapted to unusual installation conditions.

All devices can be supplied with an optional cooling element for use with higher media temperature. The DS 200 P has a flush diaphragm and can be delivered with inch thread, as well as with different process connections like clamp or dairy pipe.

Preferred areas of use are:

- ▶ pharmacy
- ▶ chemical industry
- ▶ foodstuff industry

- ▶ configuration of display, including
 - current values
 - decimal point
- ▶ contacts adjustable, including
 - switch on / switch off points
 - hysteresis / window mode
 - switch on /switch off delay
- ▶ special functions / administration
 - access protection
 - min. / max. value memory
